

My name is Stacey Haveman, and I have worked in the Ignition Interlock and breath alcohol industry for over 15 years with LifeSafer Ignition Interlock and SCRAM.

I am thrilled about the partnership with the Colorado Criminal Defense Bar and the opportunities this relationship will bring. I am committed to building a partnership where I am a resource to its members all while benefiting the client. Being local with my family residing in Parker, I am ever more committed to keeping our communities and streets safe across the great state of Colorado.

My 2025 plan is to support all CCDB members and their DUI clients by providing a wealth of information and knowledge on all things surrounding Ignition Interlock. Ultimately, CCDB members are busy enough that you should not have to worry about your clients getting taken care of. Think of me as your interlock concierge and subject matter expert for you and your clients.

Over the years, I've had the opportunity to be a trusted trainer to members of state and national legal professionals, corrections associations, probation departments, and various judges on IID and alcohol monitoring technology. Because of my industry knowledge, I've also been fortunate to have conducted over 30 Continuing Legal Education (CLE) sessions nationally.

My deep industry knowledge and proven track record makes me a reliable partner for DUI attorneys and their clients to help navigate the requirements necessary to regain driving privileges and secure the best outcomes for your clients.

Looking forward to supporting all of you and an exciting 2025.

Stacey Haveman
